What is AUGTYRO?

AUGTYRO is a prescription medicine used to treat adults with non-small cell lung cancer (NSCLC) that has spread within your chest or to other parts of the body and is caused by an abnormal ROS1 gene.

It is not known if AUGTYRO is safe and effective in children.
Before taking AUGTYRO, tell your healthcare provider about all your medical conditions, including if you:

- have nervous system (neurological) problems.
- have lung or breathing problems other than lung cancer.
- have liver problems.
- are pregnant or plan to become pregnant. AUGTYRO can harm your unborn baby. Tell your healthcare provider right away if you become pregnant or think you may be pregnant during treatment with AUGTYRO.

**Females who are able to become pregnant:**
- Your healthcare provider should do a pregnancy test before you start treatment with AUGTYRO.
- You should use effective non-hormonal birth control (contraception) during treatment and for 2 months after the last dose of AUGTYRO.
- Birth control methods that contain hormones (such as birth control pills, injections or transdermal system patches) may not work as well during treatment with AUGTYRO.
- Talk to your healthcare provider about birth control methods that may be right for you.

**Males with female partners who are able to become pregnant:**
- You should use effective birth control during treatment with AUGTYRO and for 4 months after the last dose.

- are breastfeeding or plan to breastfeed. It is not known if AUGTYRO passes into your breast milk. Do not breastfeed during treatment and for 10 days after the last dose of AUGTYRO. Talk to your healthcare provider about the best way to feed your baby during this time.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, or herbal supplements.

**How should I take AUGTYRO?**

- Take AUGTYRO exactly as your healthcare provider tells you to take it. Do not change your dose or stop taking AUGTYRO unless your healthcare provider tells you to.
- Your healthcare provider may change your dose, temporarily stop, or permanently stop treatment with AUGTYRO if you develop side effects.
- Take AUGTYRO at about the same time each day with or without food.
- Swallow AUGTYRO capsules whole with water. Do not open, crush, chew or dissolve the capsule. Do not take a capsule if it is broken, cracked, or damaged.
- If you miss a dose, or vomit at any time after taking a dose of AUGTYRO, do not take an extra dose. Just skip the dose and take your next dose at the regularly scheduled time. Do not take 2 doses at the same time to make up a missed or vomited dose.

**What should I avoid while taking AUGTYRO?**

- You should not drink grapefruit juice or eat grapefruit during your treatment with AUGTYRO. It may increase the amount of AUGTYRO in your blood to a harmful level.
- Do not drive or operate machinery until you know how AUGTYRO affects you. If you experience dizziness, blurred vision, memory loss, changes in mental status, confusion, hallucinations or have trouble with balance or coordination or problems with concentration and attention, do not drive or operate machinery until your symptoms have resolved.

**What are the possible side effects of AUGTYRO?**

**AUGTYRO may cause serious side effects, including:**

- See “What is the most important information I should know about AUGTYRO?”

**The most common side effects of AUGTYRO include:**

- dizziness
- change in sense of taste
- feeling of numbness or tingling in your arms or legs
- constipation
- trouble with balance, coordination, and walking
- shortness of breath
- problems with thinking, such as forgetfulness or confusion, memory problems and hallucinations
- tiredness
- nausea

These are not all the possible side effects of AUGTYRO.

Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.
## How should I store AUGTYRO?
- Store AUGTYRO at room temperature between 68°F to 77°F (20°C to 25°C).

**Keep AUGTYRO and all medicines out of the reach of children.**

## General information about the safe and effective use of AUGTYRO.
Medicines are sometimes prescribed for purposes other than those listed in a Patient Information leaflet. Do not use AUGTYRO for a condition for which it was not prescribed. Do not give AUGTYRO to other people, even if they have the same symptoms that you have. It may harm them. You can ask your pharmacist or healthcare provider for information about AUGTYRO that is written for health professionals.

## What are the ingredients of AUGTYRO?
**Active ingredient:** repotrectinib

**Inactive ingredients:** microcrystalline cellulose, sodium lauryl sulfate, croscarmellose sodium, and colloidal silicon dioxide. Capsule shell contains gelatin and titanium dioxide. Printing ink contains shellac and FD & C blue #2 aluminum lake.
